CONTINUING MEDICAL INFORMATION

Vol. 15, No. 03, June 2019, Total No. of Pages 16

Dear Readers,

May 2019 saw the Indian general Election with highest voter turn- out of 67% as well as highest ever participation by women. India gave her verdict on 23rd May and BJP once again proved their mettle with a surging win. PM Modi emerged as the only prime minister in history whose government returned to power with an increase in total percentage of votes and a massive mandate from the people of India. The whole world is looking up to him for another exemplary term of good governance, social reforming and re-engineering the solutions for persisting socioeconomic and international issues. We entrust our faith in him and wish him good luck.

But we need to think, what is our contribution to the society as individuals. The technology advancement is a boon or a curse when we forget our basic human duties in it's gripping distraction. A soul tearing event happened yet again in Surat, which could have been saved if only "We" would have realized that we are humans and not gadget enslaved machines... we are intellectuals with a solution to every problem, but only when our minds are free enough to think and act at the real hour of need. If all bystanders would have helped instead of making videos of the fire tragedy... many more lives could have been saved..... alas! we lost 22 innocent lives. It's high time for us to understand, what we are capable of doing in such critical situations. I really feel that each one of us should be trained in emergency and disaster management which is within anyone's reach owing to the digital power that we have in our hands. If we won't advance with the technology we will only end up becoming slave to it and that is not what we humans have evolved over the years on this planet for!

Let us evolve for ourselves, together and for better.

Kuldeep Jain
Chief Editor

Dear Doctors,

BJain group of companies started off as publishers of homoeopathic notes from doctors more than 50 years ago. Rooted in Homoeopathy the need of quality was well understood which led to the launching of BJain pharmaceuticals with a firm conviction of quality deliverance to homoeopathic professionals. For us the bird's eye view is the growth of Homoeopathy as we truly believe in its simple laws which have unbounded potential of delivering better health to all. We found the lacuna was on grass root level where the quality of medicines used to be compromised to cover up affordability.... Hence the demand of imported (German) remedies existed. We feel motivated when we realize that overcoming all the obstacles we have carved our identity of the best in class quality delivering unit. A BJain mother tincture is the result of most careful selection of the crude drug and it's transformation to a usable medicine through meticulous execution of pharmacopoeial procedures.

A homoeopathic practitioner devotes his knowledge of medicines from theoretical training to his/her clinical practice, and if his tools (medicines) lack authenticity, then false practical experiences will never let them discover the real curative action of genuine medicines that could be much more effective and wonderful in their results. This has been well emphasized by our master in §264-265, where he says, "The true physician must have available authentic medicines in perfect condition....He must know for himself that they are genuine." "It is for him a matter of conscience to be absolutely sure that the patient always receives the right medicine."

BJain promises to guard the words of our master and ensures that every patient who chooses homoeopathy, receives the most accurate medicine in the form of BJain mother tinctures and dilutions.

Dr. Vasundhara
Editor

READ IT AND REAP IT

In the hurry and bustle of the age, sometimes the physician is not in a position to devote much time to reach the simillimum. Allopathy-minded patients demand immediate relief of ailments. Many mother tinctures will at once arrest the progress of many diseases and afford instant cure.

- The book *Wonder World of Mother Tinctures in Homeopathy with Therapeutics* has been written with great endeavour and sincerity for the purpose of acquainting homeopathic practitioners with infallible drugs which can be used in tincture form.
- It contains materia medica of more than 500 mother tinctures; with the directions about dosage and repetition
- The book contains the most valuable prescriptions and experiences of the world-renowned homeopathic physicians who have gained laurels by using mother tinctures.
- There are special chapters such as instant distress redeemers in mother tinctures, clinical hits in mother tinctures and many more clinically relevant sections which add weightage to the work.

ISBN: 978-81-319-6246-6 | ₹249 | 336 pp

MOTHER TINCTURES AND DILUTIONS

The story of Homoeopathic Mother Tinctures and Dilutions

According to W. A. Dewey “the strongest liquid preparation of drugs used in homeopathy and made by macerating or dissolving the drug or its portions in alcohol or water is a mother tincture.”⁵ The mother tinctures are used to prepare subsequent homoeopathic potencies through the process of potentisation. The source of homoeopathic medicines are substances found naturally such as plants, animals, minerals and chemicals, nosodes (diseased tissues and discharges), sarcodes (healthy tissues) and imponderabilia.

Plant kingdom: The medicines of plant kingdom are made from whole plant or different parts of plant like flowers, roots, stems, leaves etc. About 65% of all remedies are prepared from extracts of plant materials, as specified in the pharmacopoeia monographs. The plant's composition affects its medicinal properties and is dependent on its species and natural environment i.e. the altitude at which they grow, the soil or water in which they thrive, the seasons in which they bear flower and fruits etc. each and every such detail is enlisted in official pharmacopoeias . The specimens

Aconitum napellus

Arum triphyllum

are usually collected in dry, sunny weather and cleaned by careful shaking, brushing and rinsing with distilled water.

- Stems (stipites) should be collected after development of leaves.
- Whole plant should be collected in flowering season, partly in flower and partly in bud during sunny weather.
- Woods are collected from young trees and shrubs before the sap rises.

Anacardium orientale

MOTHER TINCTURES AND DILUTIONS

Animal Kingdom: The medicines of animal kingdom are made from whole animal or their individual parts and secretions.

Cantharis

Snake venom extraction

Various species of animals are utilized for making homoeopathic medicines such as:

1. Arachnida –medicines made are Tarantula, Mygale, Aranea diadema, Theridion.¹
2. Orthopetra- Blatta orientalis.¹
3. Coleopetra- cantharis.¹
4. Hymenoptera- Apis, Formica rufa, Vespa .¹
5. Radiata – Corallium rubrum, Spongia tosta, Medusa.¹
6. Mollusca- Sepia, Murex.¹
7. Batrachia- Bufo rana.¹
8. Ophidia – Lachesis, Naja, Crotalus.¹
9. Mammalia – Moschus, Mephites.¹
10. Pisceses- oleum jecoris aselli.¹

Glauber's salt- sodium sulphate decahydrate

Chemicals and Minerals: Our planet is a rich reservoir of naturally occurring chemicals and minerals, and almost 30% of homoeopathic medicines are sourced from them.

It is to be noted that naturally occurring chemicals were used for original proving, which always had traces of impurities contributing to the effects of the drug for eg. Natrum mur was obtained from the sea and sulphur from naturally occurring sources rather than being prepared pure in laboratory.

Thyroid gland- Thyroidinum included in this group.⁵

Sarcodes: In Greek, the term 'sarcodes' means fleshy. Sarcodes imply protoplasm of animals as distinguished from vegetable protoplasm. They are obtained from healthy endocrine or ductless gland secretions of living human organs and lower animals which are mostly hormones . They are quick acting, and only a minute amount may have a profound effect on metabolism. Hormones are either proteins (e.g., insulin), 'steroids' (e.g., cortisone), or relatively simple organic compounds (e.g., adrenalin). Examples: Adrenalinum, Cholesterinum, Fel tauri, Insulinum, Pancreatinum, Pepsinum, Pituitarinum, Thyreoidinum, etc. In fact, sarcodes belong to the animal kingdom. Preparations of poisonous animals (Homarus, Sanguisuga, Erythrinum, etc.) are not

MOTHER TINCTURES AND DILUTIONS

Secale cor- spurred rye

Nosodes: The term nosodes is derived from the greek word “nosonos” which means “diseased”. The medicines of this category are made from inactivated diseased tissues and secretions of sick organisms whether humans, animals or plants or cultures of micro-organism. Psorinum, Medorrhinum, Bacillinum, Tuberculinum and Carcinosis are few animal nosodes while examples of plant nosodes are secale cor [ergot -The black, horn-like spur into which the grains of Rye (*Secale cereale*, N. O. Gramineae) are changed by the fungus *Claviceps purpurea*.], *ustilago maydis* (corn smut- A fungus, growing on stems and tassel of corn, proved and introduced by Burt³), *Solanum tuberosum aegrotans* (potato infected with *Peronospora infestans*, a mould⁴) etc. Besides pathological autosodes are derived from patient’s own discharges from infected lesions like vesicles, pustules etc.

Dr. Constantine Hering was the first person to perform experiments with nosodes between 1827 and 1833. The first proving that he executed on himself was of “Psorinum” and it was he who coined the term “ nosode”.²

Imponderabilia: It means that which is not weighable. This group contains medicines that are made from imperceptible and immaterial power or energies emanating from natural or artificial physical sources. Dr. Hahnemann has mentioned about such forces that can be implemented in the process of cure in aphorism 286-287.

Examples:

1. Magnetis poli umbo- The magnet
2. Magnetis polus arcticus – north pole of magnet
3. Magnetis polus australis- South pole of magnet
4. Sol- sun’s rays
5. Luna- full moon
6. Electricitas- atmospheric or static electricity
7. X-ray

Synthetic: Certain synthetic chemicals like thymol(methyl-iso-propyle phenol) sulphanimide, purified hormone corticotrophin, purified hormone cortisone etc. are also used as source for homoeopathic medicines.¹

Preparation of drugs:

The Hahnemanian way of preparation of mother tinctures resulted in varying drug strength across nine classes of herbs having varying solubilities and the quantity and nature of juices that they contained. The new methods of extraction follow the dictum passed by HPUS in 1941 which states that barring a few drugs, all mother tinctures shall be of a uniform drug strength of 1/10. These **new methods** of extraction are:

1. Maceration: This process involves those herbs which are hard, gummy, mucilaginous and hence time is needed for the extraction of their medicinal properties. Such substances which have much viscid juice prevent rapid diffusion of menstrum (alcohol) into the mass. The drug substance is cut and pounded to increase area required for penetration by the menstrum. The substance thus gets reduced to a pulpy magma which is transferred to a macerating jar. Calculated quantity of menstrum is then added to the macerating jar, enough to cover the whole portion of magma. This jar is kept sealed in a cool and dark place at 15-20° C and shaken vigorously every day for 2 to 4 weeks. Thereafter decantation is done and tincture is further expressed out with the help of

MOTHER TINCTURES AND DILUTIONS

tincture-press. The tincture thus obtained is measured and menstrum is further added to reach the desired volume and drug strength.⁵

2. Percolation: It is a comparatively short process, specially implemented for the extraction of dried vegetable and animal drug substance.⁵ A percolator is used for extraction which is a stainless steel equipment having two parts:

- The percolator proper
- The receiver

The dried drug powder is reduced to proper degree of fineness by double sieving and moistened with sufficient menstrum before placing it in the percolator.

A piece of fine, clean muslin is tied to the neck of percolator and the "tow" is then placed on it. The "tow" is a porous material made up of layers of following:

- Plug of absorbant cotton, inserted in the neck⁵
- ¼" thick layer of coarse sand⁵
- ½" thick layer of medium coarse sand⁵
- Layer of maximum coarse sand or powdered green glass⁵

After the tow is placed, the moistened drug is placed above the tow and pressed gently with a broad flat cork attached to a glass rod and a disk of filter paper is placed on the upper surface. The menstrum is added very gently along a glass rod

with cork attached to the lower end. Once the whole menstrum is poured the lid of percolator is closed and as soon as liquid starts dropping the mouth of the percolator is closed. It is allowed to stand for 24 or more hours after which the valves are opened and the stop-cork is regulated to allow the liquid come out drop by drop, (not exceeding 10-30 drops/min) The tincture thus obtained is tested for drug strength and filtered into dry glass bottle.⁵

Dilutions

The mother tincture obtained through new methods have a uniform drug strength of 1/10 and are used to make homoeopathic dilutions through the process of dynamisation or potentisation. According to *Dr. Stuart Close, "Homeopathic potentization is a mathematico-mechanical process for the reduction, according to scale, of crude, inert or poisonous medicinal substances to a state of physical solubility, physiological assimilability and therapeutic activity and harmless, for use as homeopathic healing remedies."* The reduction is done on fixed scales of 1/10(decimal), 1/100(centesimal) or 1/50,000 (50millesimal) through succussion or trituration.

1. Succussion: It is the process of potentisation of liquids i.e. starting from mother tincture each subsequent potency is raised by diluting 1 part of starting drug solution with 9 parts (decimal scale) or 99 parts (centesimal scale) of alcohol or water and given firm, downward strokes.

2. Trituration: It is process of potentisation of insoluble dry substances with sugar of milk. One part of powdered drug substance and 1/3 portion of the total quantity of sugar of milk(9 parts in decimal scale and 99 parts in centesimal scale) are taken in a mortar and grinded(6 minutes), mixed(3 minutes) and scraped(1 minute) repeatedly for 10-10 minutes each. After 20 minutes another 1/3 portion of sugar of milk is added and the same procedure is repeated. Then the final 1/3 portion of sugar of milk is added and again the same 20 minutes procedure is repeated making it a complete 1 hour trituration which results in the formation of 1 potency higher than the starting potency of drug taken.

MOTHER TINCTURES AND DILUTIONS

Dynamisation or potentiation is a homoeopathic signature process done to unleash the dynamic energy of crude drug substances and the systematic reduction of their doses. Arndt says, “Weak stimuli accelerate vital activity, medium stimuli raise it slightly, strong ones suppress it and very strong ones halt it.” The simplified meaning is “*small doses stimulate, medium doses inhibit and large doses kill*”.

The potentiation of drugs gives homoeopathic dilutions which are employed in the treatment of a wide range of corporeal illness. The homoeopath chooses the potency keeping in view the susceptibility of the patient and the severity and character of the sickness. He can choose his weapon from an array of mother tinctures, dilutions and biochemic remedies, which is a skill learnt from experience.

Homoeopathy stands on the shoulders of homoeopathic practitioners and homoeopathic manufacturers or pharmaceuticals, and the competency of either of them is vital for the development of this science.

ABIES NIGRA

Botanical Name : Coniferae

Common Name : Black Spruce

Habitat : America

Clinical³ : Constipation, Cough, Dyspepsia, Eructations, Haemorrhages, hypochondriasis, malarial fevers, Tea effects of, Tobacco effects of.

Indications:

- ✦ "Pain in the stomach always comes after eating," says Guernsey.³
- ✦ The dyspepsias caused by abuse of tea or tobacco have been cured by it.³
- ✦ The tincture relieved the usual severe pain in the stomach after eating, the acid eructations, and the frequent vomiting of food.¹ Great craving for food at noon and night. Total loss of appetite in morning.⁶
- ✦ Where this symptom is present, whether in dyspepsia, lung disease (when the sensation is as if there was a hard substance to be coughed up) with or without haemoptysis, constipation, and Ab. n. will be the most likely remedy.³
- ✦ Dyspnoea; worse lying down; sharp, cutting pain in heart; heart's action heavy and slow; tachycardia, bradycardia.²
- ✦ Chronic intermittent fever, accompanied by this peculiar distressing pain above the stomach.⁴

Prescribed dose : Mother tincture and 3x.⁵

THE RAW MATERIAL

- Highest & purest quality of raw material
- Obtained from original source of cultivation or reliable vendors
- Medicines where herbs are extinct/nosodes/sarcodes – back potencies are procured from reliable European sources
- All the raw material is strictly tested through the standard laid by HPI, HPUS, or GHP as applicable
- In-house preparation of all back potencies
- Grain based Extra Neutral Alcohol is used as vehicle
- Company maintains the reference sample of all herbs used in making of mother tinctures to ensure consistency in future batches.

PREPARATION

MOTHER TINCTURES

- Maceration for 21 days or percolation, whatever is applicatory procedure
- Hydraulic pressure for complete extraction of medicinal principles of drug substance
- Stainless steel 316 grade jars (highest quality steel) are used for manufacturing and storing
- Ageing of all mother tinctures
 - ✓ To ascertain maximum dissolution of drug substance into the menstrum (alcohol)
- Documentation pertaining to all manufacturing and testing protocols

LIQUID DILUTIONS

- Dilutions are prepared from the best quality Mother Tinctures prepared in-house which assures the quality
- Back potencies are prepared from the latest and validated K-Tronic Potentiser
 - ✓ 99.6% precision
- Documentation pertaining to all manufacturing and testing protocols

B.JAIN PHARMACEUTICALS PVT. LTD.

of QUALITY & AUTHENTICITY

ENVIRONMENT

- Prepared in ISO Class 7 & Class 8 environment
 - ✓ Cleanrooms maintain particulate-free air through the use of HEPA filters employing laminar or turbulent air flow principles
 - ✓ HVAC System installed with positive and negative air pressure as per requirement
- Separate entry for man and material
- Double layered gowning in clean rooms
- Puffed panelled walls and ceiling
- Epoxy flooring
- An independent Microbiology laboratory

Back Potency Storage

RANGE, STOCK AND PACKAGING STORE

- We maintain stock of fast moving dilutions for quicker processing
- For medicines which are less in demand, back potencies are kept ready at all times and high potencies are made on order in minimum time
- Dilutions available in different alcohol % as per customer need & pharmacopeia standard

PACK SIZES AVAILABLE

Mother tincture: 30ml, 100ml.

Dilutions: 10ml, 30ml, 100ml.

LM potency: 6g. **Potency range:** 0/1 – 0/30.

Information for registered medical practitioner only

Quality | Safety | Consistency

The following are new introductions in our list of mother tinctures with their indications:

1. ACTAEA SPICATA:

- Nat. order, Ranunculaceae.¹
- Common names, Baneberry, Herb Christopher¹
- Preparation, Tincture from the root obtained in the fall.¹

Indications:

- Pains worse from touch and motion.²
- Respiratory - Short, irregular breathing at night, while lying. Great oppression. Shortness of breath on exposure to cold air.²
- Extremities- Rheumatic pains in small joints, wrist, [Ulmus] fingers, ankles, toes. Swelling of joints from slight fatigue. Wrist swollen, red, worse any motion.²
- Cancer of the stomach with tearing, drawing pains.³

2. JACARANDA C (Jacaranda caroba):

- Natural order, Bignoniaceae.³
- Common names: Brazilian caroba tree.³
- Preparation, Trituration of the flowers.³
- Historical dose: Tincture and all potencies, tincture to third potency.³

Indications:

- Jacaranda caroba has reputation as a remedy in venereal diseases and rheumatism.³
- Contact of urine with chancre causes tearing pains. Prepuce much swollen, could not be drawn over glans, on attempting to do so, copious discharge of yellowish green pus.³
- Neck so painful that the head cannot be turned to right. Stiffness in loins.³
- Sensation as if the heart beat in the pit of the stomach.³
- Rectum- Constipation. Itching at the anus while sitting.³

3. OENANTHE CROCATA:

- Natural order, Umbelliferae.¹
- Common names, Drop-water, Safran-rebendolde.¹
- Preparation, Tincture of the root.¹
- Historical dose: Tincture and all potencies, first to sixth potency.³

Indications:

- Oena. is a valuable convulsive remedy, useful in epileptiform, puerperal and uremia convulsions. It has epileptic convulsions, worse during menstruation and pregnancy.³
- Abdomen- Tympanites with the convulsions. Great tenderness, slightest touch on any part of abdomen causes great pain.³
- Back- Pain along spinal column. Intense action of dorsal and lumbar muscles, opisthotonos.³
- Limbs- Convulsions. Hands clenched during tetanus. Arms flexed at elbow in a right angle. Pain along crural and sciatic nerves, commencing in back. Cramps in calves.³

4. RHAMNUS FR. (Rhamnus frangula):

- Natural order, Rhamnaceae.¹
- Common names, Black alder, Buckthorn alder.¹
- Preparation, Tincture (and triturations) of the bark, gathered in spring from the younger branches.¹

Indications:

New Additions to the Family of BJAIN MOTHER TINCTURES

- Aversion to food. Eructations and efforts to vomit. Frequent vomiting instead of diarrhoea.⁴
- Distension. Profuse emission of flatus. Increased peristalsis.⁴
- Itching in anus. Violent tenesmus. Constipation at first followed by diarrhoea.⁴

5. AMOORA ROHITUKA (Andersonia):

- Family: Meliaceae
- Common name: Rohituka, Royna, Rohera, Rohido, Harinhara and Pitaraj
- Preparation: Tincture of the bark.
- Prescribed dose: 3x, 6x, and 30

**Indications:**

- Chronic fever; general debility; enlarged glands; liver and spleen disorders; leucorrhoea.⁵
- Mistakes in spelling, place, etc.; can't fix mind in any subject; easily angered.⁵
- Burning sensation in the stomach; enlargement of the liver and spleen; nausea and vomiting.
- Eyes- Heaviness; dim sightedness at night; symptom of constipation must be present; difficulty in reading and writing.⁶ Burning in eyes.⁷
- Continuous flow of urine with tendency to frequent urination; colour green or, turbid yellow, frothy.⁶
- Piles with burning and stitching pain in rectum < during and after stool.⁶

6. COCA:

- Natural order, Lineae (suborder, Erythroxylae).
- Synonyms: Erythroxylon Coca, Lamarck. Hayo. Ipadu
- Preparation, Tincture of leaves.
- Historical dose: Tincture and all potencies, tincture to third potency

**Indications:**

- The mountaineer's remedy. Useful in a variety of complaints incidental to mountain climbing, such as palpitation, dyspnoea, anxiety and insomnia.²
- Loss of voice. Give 5-6 drops, every half hour, two hours before expected demand on voice.²
- Caries of teeth.²
- Emphysema. Want of breath, short breath, especially in aged athletes, and alcoholic users.²
- Weak vocal cords. Hoarseness; worse after talking.²
- Noises in ear. Headaches of high altitudes.²
- Violent palpitation : from incarcerated flatus ; from overexertion;from heart strain.⁸

7. CUBEBA OFFICINALIS:

- Natural Order, Piperaceae.
- Common Name, Cubebs.
- A tincture is made from the dried berries of the Piper Cubeba, L.
- Dose : Second and third attenuation.

**Indications:**

- Leucorrhoea in little girls.²
- Cubeba is an old-world remedy for gonorrhoea and gleet.³
- Hematuria. Cystitis. Urethritis with much mucus, especially in women.³
- On attempting to smile or speak his mouth seems to twist to one side.³
- Stools, gelatinous of transparent mucus, mixed with whitish, shining particles like rice, worse night in bed better getting up and walking about. Stools cold.³
- Craving for oranges, onions, almonds and nuts.³

8. IBERIS AMARA:

- Natural order, Cruciferae.
- Common name, Bitter candytuft.
- Preparation, Tincture of the seeds.
- Historical dose: Tincture and all potencies.

**Indications:**

- Aware of heart's action. Sad, down-hearted, oppressed with desire to sigh.³
- An excited, frightened feeling with cold sweat on face. Fearful and trembling.³
- Cardiac debility after influenza.²
- Liver region full and painful.²
- Palpitation, with vertigo and choking in throat.²
- Violent palpitation induced by slightest exertion, or by laughing, or coughing. Cardiac dyspnoea. Tachycardia²

9. Oryza Sativa:

- Family: Poaceae
- Common name: Rice

**Indications:**

- Generals- Dystrophy of muscles.¹⁰

10. Xanthoxylum Fraxineum (Zanthoxylum americanum Mill):

- Natural Order, Rutaceae.
- Common Name, Prickly ash.
- Natural distribution: Grows in Northern, Middle and Western United States from Virginia to Texas
- Part used: Bark.
- Prescribed dose : First to sixth potency.

**Indications:**

- Chronic rheumatism and catarrhal conditions involving the bile duct and pharynx.⁹
- Weak, delicate women, who suffer from profuse menstruation and spasmodic and neuralgic dysmenorrhoea, the pains extending along the course of the anterior crural nerve.⁹ worse, left side²
- After-pains and ovarian neuralgia when the pain extended down the anterior surface of the thigh.⁹
- Mental depression, throbbing headache, with loss of appetite and a sensation of fullness in the epigastric region.⁹
